Association of Fish and Wildlife Agencies, *Resolution 1965-06-26 Professional Resource Managers on Military Reservations* (1965),
Available at: http://digitalcommons.law.msu.edu/afwa_reso/549

This Conference Proceeding is brought to you for free and open access by the The (International) Association of Fish & Wildlife Agencies Conservation Collection at Digital Commons at Michigan State University College of Law. It has been accepted for inclusion in Resolutions by an authorized administrator of Digital Commons at Michigan State University College of Law. For more information, please contact domannbr@law.msu.edu.

Conservation Service, is designed to assist small groups of landowners, situated along existing waterways, in the creation of channels and impoundments to provide these landowners with drainage and flood control benefits; and

Whereas, many of these waterways provide habitat for fish and wildlife, the benefits from which constitute a major resource legally belonging to all of the people of the respective states; and

Whereas, impoundments and channelization generally result in the diminution or destruction of existing fish and wildlife resources in exchange for the immediate personal and financial benefit of the few; and

Whereas, Public Law 566, as presently written, does not require measures for the preservation and protection of fish and wildlife, nor mitigation of damages caused by drainage and flood control projects;

Now, therefore, be it resolved, that the International Association of Game, Fish and Conservation Commissioners urges the Congress of the United States to amend Public Law 566 to recognize fish and wildlife as important public resources, the protection, preservation, and mitigation for the loss of which must be made a part of project responsibility, included as a condition of project approval, and financed entirely with Federal funds.

RESOLUTION NO. 6

PROFESSIONAL RESOURCE MANAGERS ON MILITARY RESERVATIONS

Whereas, military reservations control vast holdings of lands, waters, wildlife and other natural resources in the United States; and

Whereas, federal law requires commanders of military reservations to plan and implement a conservation program; and

Whereas, very few military reservations have permanently assigned, professionally trained personnel to supervise their conservation programs;

Now, therefore, be it resolved that the International Association of Game, Fish and Conservation Commissioners urges the Department of Defense to provide for the permanent assignment of professionally trained personnel to supervise the natural resource management programs on all major military reservations and to provide professional assistance at regular intervals to those installations where the resources are inadequate to justify a full time assignment.

RESOLUTION NO. 7

WATERFOWL PRODUCTION AREAS

Whereas, there continues to be an urgent and growing need for the preservation of waterfowl production habitat in the member states of this Association; and

Whereas, due to budgetary limitations many of the states are unable to acquire lands for waterfowl nesting habitat; and

Whereas, the states are capable of accelerating the waterfowl nesting habitat program if provided financial assistance;

Now, therefore, be it resolved that the International Association of Fish, Game and Conservation Commissioners urges the Congress to appropriate funds on a non-matching basis to be made available to the states for purchasing waterfowl production areas; and

Be it further resolved that the Grants-in-Aid Committee is directed to prepare the necessary legislation and that an all-out effort be made by the Association to obtain passage of this legislation at the next session of Congress.

RESOLUTION NO. 8

FISH AND WILDLIFE PROBLEMS AT CORPS OF ENGINEERS PROJECTS

Whereas, the Congress of the United States has repeatedly expressed the Nation's desire to conserve and develop fish and wildlife resources as a part of its water-development program, initially by the passage of legislation in 1934 and subsequently by amendments under which the legislation was strengthened and designated as the Fish and Wildlife Coordination Act; and

Whereas, the Congress of the United States has recently reaffirmed its concern for the welfare of our fish and wildlife and other outdoor recreational resources by the passage of a number of measures, including the Outdoor Recreation Act, the Wilderness Act, the Land and Water Conservation Fund Act, the Refuge Revenue Sharing Act, and others; and

Whereas, the President, on May 15, 1962, approved for application by the Departments of the Interior, Army, Agriculture and Health-Education-Welfare policies, standards and procedures for use and development of water and related land resources cited as Senate Document 97, which provides that "Full consideration shall be given to the opportunity and need for outdoor recreation and fish and wildlife enhancement in comprehensive planning for water and related land use and development, and project formulation and evaluation;" and

Whereas, it is in the best interest of our Nation that such resources be conserved and developed; and

Whereas, in the past the Corps of Engineers maintains that it will consider only navigation in the issuance of permits for construction, dredging and filling activities in navigable waters of the United States; and

Whereas, the Corps is presently implementing a policy which would place the burden of mitigating fish and wildlife damages on the fish and wildlife agencies, except for such integral structures as fishways,

Now, therefore, be it resolved that the International Association of Game, Fish and Conservation Commissioners requests the Secretary of Defense to instruct the Corps of Engineers to:

1. Respect the intent of the Congress as expressed in the Fish and Wildlife Coordination Act and rescind the interpretation of the Fish and Wildlife Coordination Act which was presented recently by the Corps before the Senate Public Works Subcommittee on Appropriations and wherein the Corps proclaimed it will not undertake fish and wildlife mitigation except for those features which it considers to be integral parts of the projects.
2. Respect Senate Document No. 97 regarding policies, standards, and procedures for use and
